Shaun:

Thanks so much for your response and thanks for your good comments.

At our meeting of the Columbia River Toxics Reduction Workgroup, we worked on a vision statement for future toxics reduction work and we heard from many people, "where is NRCS?"

I look forward to hearing from you and we would love to get you involved in our work.

ML

RE: Proposed Future Vision Paper for Feb 7 Discussion

Hello Mary Lou and Meta,

Sorry this has taken me so long to get to. I don't have much to add to the paper May Lou. As far as toxics go, NRCS doesn't play an enormous role. We focus on risk assessments of agro-chemicals. Along those lines we maintain WinPST a pesticide screening tool that has a large pesticide properties database behind it. One of the goals was a database on toxics. Any insight we have as far as database structure and maintenance of databases we would be happy to share.

The report focuses on toxics that are not specifically the agro-chem area we deal with. We have a number of programs, especially in and near the Columbia River to use Integrated Pest Management (IPM) and reduce pesticide and herbicide inputs into both surface and ground water. That may be an area that we could help you add into the report if you feel it belongs there. I am out of town until next week but I will give you a call then. Thanks, Shaun

Shaun and Meta:

Now is the time that I could use your help.....

Here is vision paper for next week's discussion. Do you have anything to add from NRCS perspective. I would love to get feedback from you.

Proposed Future Vision Paper for
Feb 7 Discussion(Document link:
MaryLou Soscia)

Here is the vision paper for our Feb. 7 Vision discussion. I believe I got everybody's comments - please let me know by COB Monday if I missed your comments.

Thanks so much
